DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Roddy, Baudart et al or Ueno et al ('630). Baudart et al (Abstract), Roddy (col. 3, line 55-col. 6, line 21) and Ueno et al ('630) (col. 3, lines 49-62) all teach a multifocal ophthalmic lens having a first portion having first constant focal properties, a second portion having a downwardly progressive focal properties and two regions on either side of the second portion that have focal properties selected to avoid distortion.

Allowable Subject Matter

Claims 12-16 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented, for example, in independent claim 1, which

Art Unit: 2873

include a method of making a multifocal ophthalmic lens by joining the distance lens piece and the progressive lens piece such that the progressive lens piece is substantially outside the critical regions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
